

Reducing agent FLUX

Product characteristics and Using purposes

This product aims at collecting precious metals that are existed in the slag for the purpose of improving STS restoring work of electric furnace. Also, the product enhances slag stirring performances and makes workability good by making the slag dissolved well, and is used by ejecting reducing agents to molten steel layer with oxygen auto insufflator using compressed airs as a power type.

Metallurgical characteristics

화 학 성 분 (Chemical composition)				물 리 적 특 성 (Physical properties)			비 고 (Remark)
M-Al	Si	C	S	수 분 Moisture	입 도(mm) Particle size	비 중 Specific gravity	
30~40	25~35	5~10	0.3% Max	3% Max	3mm Max 80% Min	1.5~3.0g/cm ³	

Packing type

- Moistureproofing Bag packing per 1 ton unit
